

as a concerned american i feel it is wrong to expand lpfm and condense national radio stations to a local or regional level,air 1 has worked for years as have many national networks,and for you to shut them off and allow local types of stations to exude there type of format,whatever it be, is not in our best interests. futhermore i believe it infringes on my civil liberties on what i choose to listen to and for someone to provide that choice.as much christian bashing that goes on and how the aclu trys to take my religious freedoms away i would at least want to know that a private org. like air 1 witch is listener supported should be embraced and allowed to continue to broadcast to use thruout the usa period.90.1 and 89.5 and 100.7
